10. DATE OF NEXT MEETING - February 9, 2021

11. ADJOURNMENT - 7:56PM (P. Banga)

City of Mississauga Memorandum

Date: 2021/02/04

To: Chair and Members of Mississauga Cycling Advisory Committee

From: Fred Sandoval, Active Transportation Coordinator, Active Transportation
Amy Parker, Active Transportation Technologist, Active Transportation

Meeting Date: 2021/02/09

Subject: 2021 Quarterly Cycling Program Update

The City of Mississauga has an annual cycling program for the installation of cycling infrastructure by the Transportation and Works (T&W) department (along street rights-of-way) and the Community Services (CMS) department (outside of street rights-of-way). The Cycling Program is consistent with the 2018 Cycling Master Plan.

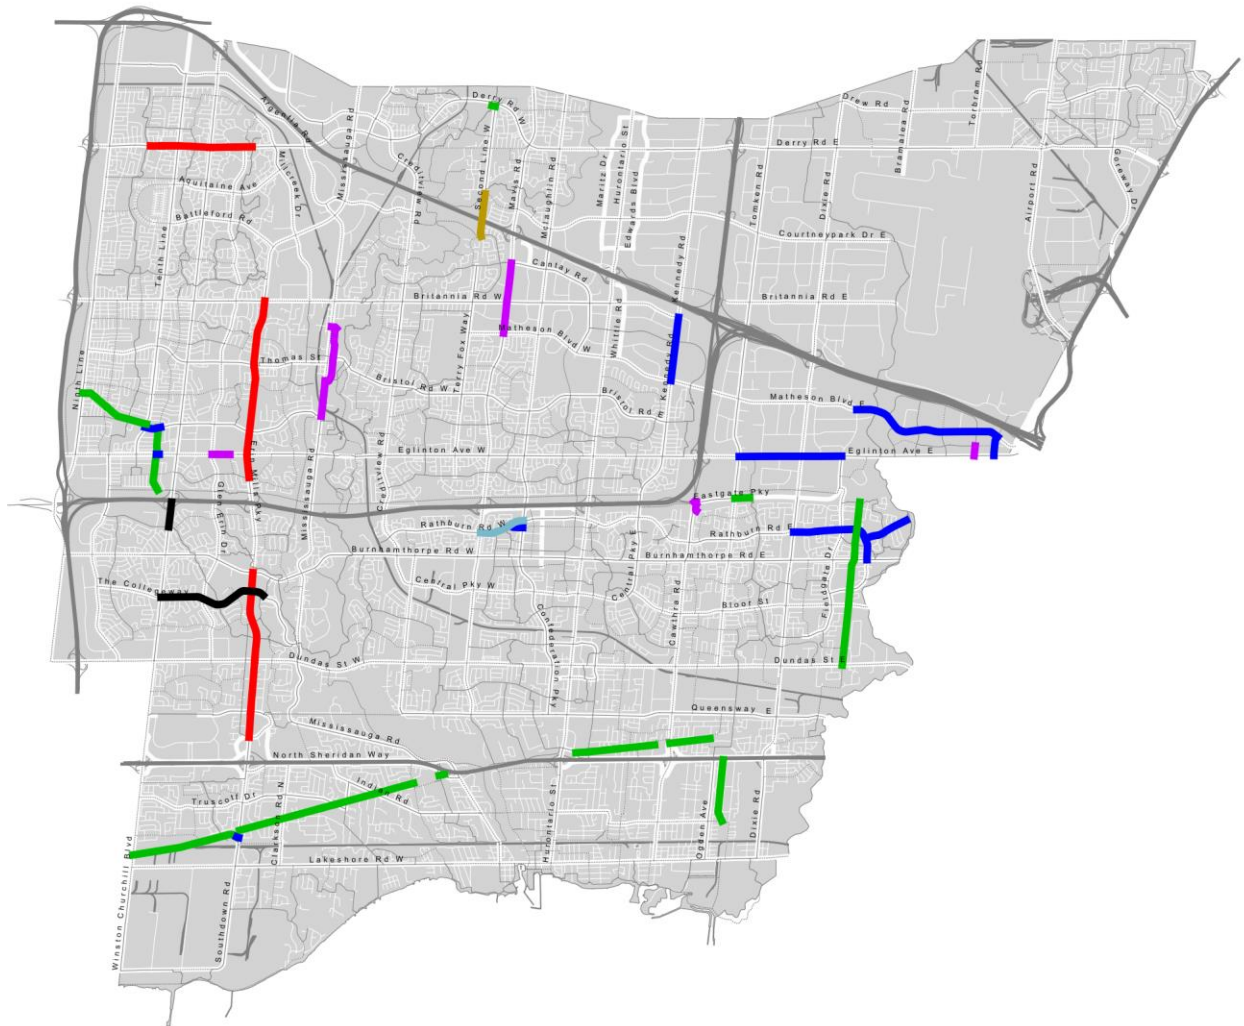

In 2020, the Transportation & Works department planned to construct 4.17 km of new cycling infrastructure. Currently, 0.36 km (9%) of this infrastructure is complete. An additional 1.40 km is currently under construction. This year, 10.22 km of new cycling infrastructure is planned to be installed by the Transportation & Works department.

The Community Services department plans to implement 22.36 km of off-road trails throughout the city. At this time, 12.30 km (55%) of this infrastructure is complete and 3.80 km is under construction.

An additional 9.71 km of cycling infrastructure is planned to be constructed by the Region of Peel or Ministry of Transportation (MTO). 4.15 km (43%) of this infrastructure is complete and 2.02 km is currently under construction.

Cycling infrastructure is being implemented with ongoing funding from the City of Mississauga and Region of Peel. The City of Mississauga has also applied for funding through the federal-provincial Investing in Canada Infrastructure (ICIP) Resilience Program.

Note that the nature and schedule of the projects listed here are subject to change in accordance with budget, engineering and construction constraints, public consultation and Council approval. All lengths are shown in kilometres, measured along the road centreline (except for off-road trails), from the centre of intersections. Actual paved surface length may differ.
