Environment + Museums of Mississauga

re-sil-ient

*the ability of communities to respond and recover
from the effects of a changing climate*

Objective and Outcomes

- Create awareness and understanding of climate change in Mississauga (and globally);
- Explore resident experiences with climate change in our backyard through storytelling and photography;
- Showcase climate action projects in Mississauga to demonstrate the resilience of our community through engaging exhibitions and public programming;
- Engage with the public on climate change using culture as a medium to ignite dialogue and participation;
- Empower residents to take climate action and work towards creating a sustainable community.
