

City of Mississauga Memorandum

Date: 2021/03/23

To: Chair and Members of the Meadowvale Village Heritage Conservation District Subcommittee

From: John Dunlop, Manager, Heritage Planning and Indigenous Relations

Meeting Date: 2021/04/06

Subject: Willow Lane Culvert Update

The City's Transportation Infrastructure Department is awaiting further direction from the consultant regarding the ability to replace the installed steel beam guardrail currently located on the east side of Willow Lane and Old Derry Road.

In the meantime, the City's Parks Department and Transportation Infrastructure Department has begun a guardrail beautification program adjacent to the Brueckner Rhododendron Garden.

The project involves wrapping the guardrails in a vinyl wrap which are meant to beautify the steel beams and otherwise disguise them.

This is brought to the committee for information and consideration, should there be no resolution to the nature of the materials used on the guardrails.

Photos for the Parks project are as follows:

Vinyl wraps can be printed with any kind of design, and can include specific imagery or colours which can camouflage unsightly infrastructure.

John Dunlop, Manager Heritage Planning and Indigenous Relations
