changing
diabetes

The City of Mississauga recognizes the need to accelerate city action to prevent Type 2 diabetes and its complications. There is great potential to improve health and well-being, combat health inequalities, reduce long-term costs, and ensure productivity and growth in our cities.

THE TYPE 2 DIABETES CHALLENGE

Type 2 diabetes is rising at an alarming rate around the world. Given the devastating human and economic cost of Type 2 diabetes and its complications, individuals, communities, healthcare systems and societies are being put under unsustainable pressure.

More than half of the world’s population lives in cities. Cities are engines of economic growth and innovation. Yet some of the drivers of their prosperity also lead to widening health inequalities. Urban environments significantly impact how people live, travel, play, work and eat — factors that, in combination, affect the rise in Type 2 diabetes. This puts cities on the front line of the Type 2 diabetes challenge.

City leaders’ closeness to the lives of their citizens and their ability to drive change puts city leaders in a prime position to tackle the challenge and bend the curve on Type 2 diabetes.

THE URBAN DIABETES DECLARATION

As a partner city in Cities Changing Diabetes, Mississauga is committed to five principles to guide the actions we deliver to respond to the Type 2 diabetes challenge. We will:

- 1

INVEST IN THE PROMOTION OF HEALTH AND WELL-BEING

Cities have great potential to be health-promoting environments. This will require a shift towards viewing the prevention of Type 2 diabetes and its complications as a long-term investment rather than a short-term cost. Therefore, **we must prioritize health-promoting policies and actions to improve health and well-being for all.**
- 2

ADDRESS SOCIAL AND CULTURAL DETERMINANTS AND STRIVE FOR HEALTH EQUITY

Social and cultural determinants are root causes that shape citizens’ opportunities for healthy living. Striving for health equity is essential in order to provide healthy opportunities for all. Therefore, **we must address social and cultural determinants in order to make the healthy choice the easier choice.**
- 3

INTEGRATE HEALTH INTO ALL POLICIES

Health is linked to other policy agendas, including social, employment, housing, neighbourhood development and environmental policies. To improve the health and well-being of citizens, health must be integrated into decision-making processes across departments and be driven by shared policy goals. Therefore, **we must coordinate action across departments to integrate health into all policies.**
- 4

ENGAGE COMMUNITIES TO ENSURE SUSTAINABLE HEALTH SOLUTIONS

Health is largely created outside the healthcare sector, namely in community settings where people live their everyday lives. Health actions should move beyond the individual level to include the community settings where social norms that shape behaviour are created. Therefore, **we must actively engage communities in order to strengthen social cohesion and drive sustainable health-promoting actions.**
- 5

CREATE SOLUTIONS IN PARTNERSHIP ACROSS SECTORS

Health is a shared responsibility. Creating sustainable solutions demands that all members of society acknowledge the health impact of their actions. Combining competences and pooling resources and networks are prerequisites to creating innovative, effective and sustainable solutions. Therefore, **we must work together to share the responsibility for creating solutions, as no single entity can solve the challenge alone.**

CITY OF MISSISSAUGA

Mayor Bonnie Crombie
Mississauga, Canada, Nov. 10 2021

Stephen Dasko
Councillor, Ward 1

Karen Ras
Councillor, Ward 2

Chris Fonseca
Councillor, Ward 3
