

# Kinsmen Hall

## Accessibility Upgrades

Project Manager: Melissa Anastacio

Project Architect: BSN Architects

MISSISSAUGA

# Existing Ramp Condition 1

- Ramp & Landing widths do not satisfy current FADS standards
- Tactile surface indicators not provided (fall hazard)

## Existing Ramp Condition 2

- Entry door does not meet current FADS standards. Door requires widening to accommodate wheelchairs more comfortably

# Existing Ramp Condition 3

- Entrance canopy does not provide sufficient shelter and protection from the elements.
- Canopy drains water onto stairs (slipping hazard).

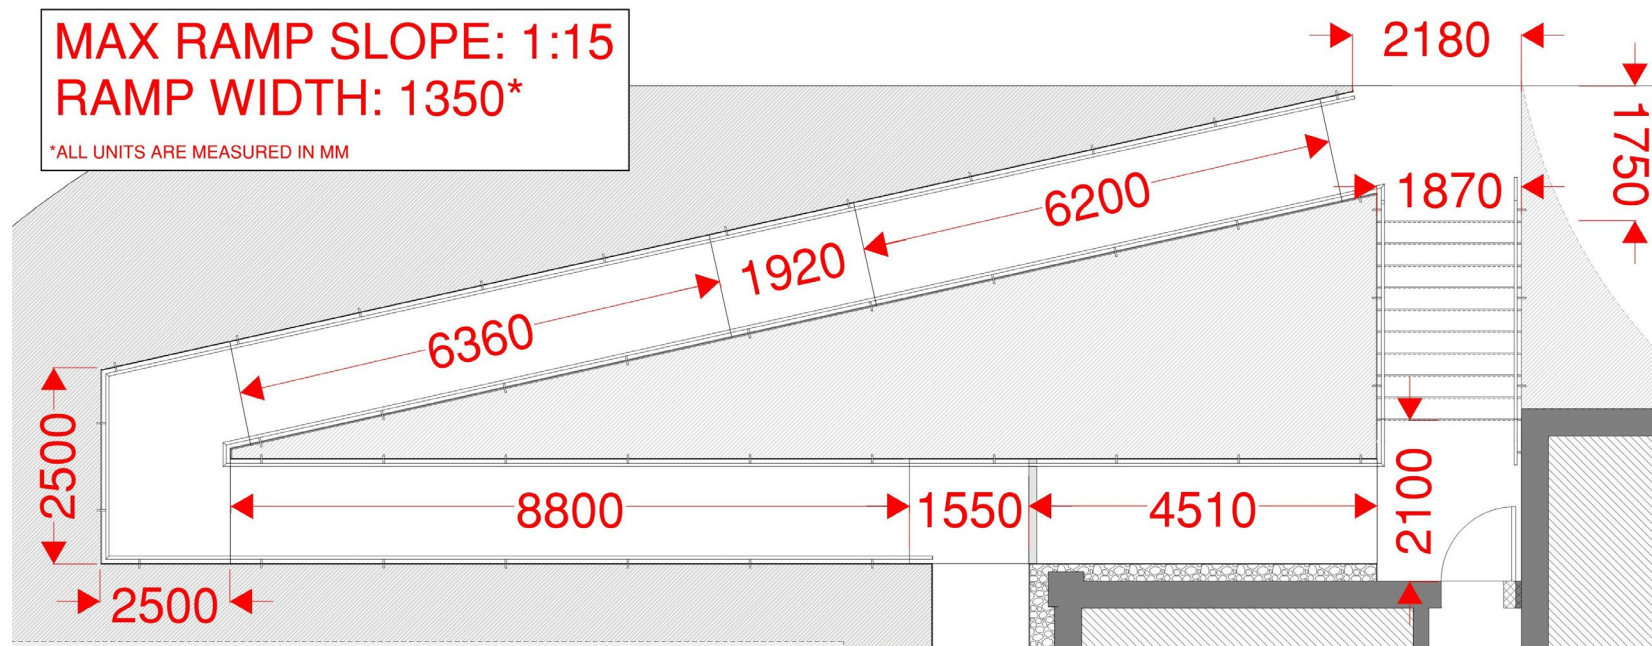

# Proposed Ramp Condition 1

- 1:15 maximum slope ramp as per FADS
- Increased ramp and landing widths
- Edge protection at ramps

# Proposed Ramp & Landing Dimensions

# Proposed Canopy and Door Widening

- Larger canopy provides enhanced protection to landing.
- Wider door provides 965mm minimum clear door opening
