Chair and Committee Members:

Re: Micro-mobility Program Development Phase 1 Report

On behalf of the Mississauga Board of Trade (MBOT), I am pleased to write to Committee today to offer our support for the recommendations in this report.

Mississauga like other municipalities should embrace new and environmentally responsible modes of transportation for its residents and visitors to get around our city.

Micro-mobility modes of transportation have become very popular and provide commuters with yet another option in their travels.

Private sector operators of these systems have a proven track record of superior service and reliability and should be considered strong partners with the City of Mississauga in the delivery of this program.

We hope and trust that Committee will recommend going ahead with this initiative and would be pleased to offer our help in any way.

Yours truly,

Trevor McPherson
