Received7. PUBLIC QUESTION PERIOD - 15 Minute Limit

Natalie Halff, Resident asked the following question(s)

The goal of Vision Zero is no injuries or fatalities, is the City tracking the number of injuries and fatalities and what does the data show since 2018 when Vision Zero was adopted in Mississauga?

Laura Zeglen, Project Leader, Vision Zero responded that the City is tracking collisions on City and Regional roads, since Vision Zero was adopted we've drastically improved our procedures for being able to process the collision reports from Peel Regional Police to implement safety measures across the City. Ms. Zeglen noted that staff would be bringing a report to General Committee with a more wholesome overview of the progress of Vision Zero which will include collision stats.

Rahul Metha, Resident asked the following question(s)

1. Clarity on why the Tour de Mississauga is not on this agenda although the Action Item List states it will be coming back to the September meeting and if it is coming back will there be an effort to engage the local community cycle groups?

Matthew Sweet, Manager, Active Transportation responded that a discussion regarding the Tour de Mississauga will be discussed at the October meeting.

2. Regarding items 6.3, 9.2 and 9.3: we continue to build sharrows and bike lanes, despite internal and increasingly documented external studies that few feel safe in this type of infrastructure, drivers are often confused, cyclists feel neglected and in some cases roads become more dangerous. This consideration, and the lack of most cycling issues to be reported on the PingStreet app (such as the ability to report lack of curb cuts, faded bike lanes, gaps in infrastructure, street-sweeping/winter plowing required for trails/bike lanes, damaged bollards, litter/glass on a bike lane, etc) begs the question - why not redirect sharrow/signed route funds to increased Pingstreet features and more by-law monitoring and enforcement?

Matthew Sweet, Manager, Active Transportation responded that sharrows are now being utilized as more of a way-finding device and shared routes are used where and when we can do the best they can and coordinating that with traffic calming measures.

8. CONSENT AGENDA

No item(s) were approved under Consent Agenda.
