

Key Recommendations

- Deliver and maintain technical rescue certification for all staff required to perform technical rescue services.
- Use the 2024 Asset Management Plan to develop an improved lifecycle replacement plan that will inform the 10-year capital budget process.
- Apply the principles of the Corporate Green Building Standard in the construction of new, permanent fire infrastructure.
- Study the use of electric vehicle technology for front-line fire vehicles and machinery.
- Update overall programming and strategies in all sections of Fire and Emergency Services to reflect results from the 2023 Community Risk Assessment.
