

DRAFT DESIGNATION STATEMENT

26 Stavebank Road is a large church on the west side of Stavebank, south of Park Street East.

Statement of Cultural Heritage Value or Interest

The property has design and physical value as it is a rare example of 1950s Contempo architecture in Mississauga. The property has historical value due to its association with a longstanding Anglican community and the significant Port Credit figures who established it. It is also valued for its association with Molesworth, Secord and Savage. The property has contextual value as a landmark that is physically, functionally, visually and historically linked to its surroundings. The church is also important in defining, maintaining and supporting the character – a campus of religious and recreational institutions on the east bank of the Credit River – of the area.

Heritage Attributes

- Its location and visibility from Port Credit Memorial Park, Park Street East and Stavebank Road
- Credit Valley stone material
