**Re: Lime**

To Whom This May Concern,

Lime was introduced to Malton in the Fall of 2025. GLE was fortunate to be one of the first organizations connected to Lime where students received a soft launch and tested the e-scooters and e-bikes as a form of shared-green transportation in their neighbourhood.

As an educator in this community for 20 years, I am aware of the barriers many of our families and students face with transportation. Many parents do not own a vehicle so students and adults are forced to walk or pay for public transportation to get to and from school, work, appointments and extra-curricular activities.

In the Fall of 2025, GLE started a ride-to-school initiative to promote community, being an active citizen and practice time management. We were blessed to have Lime as one of our partners who provided free transportation and then introduced Lime assist to help our families and students in financial need so that this form of transportation could be sustainable.

Lime is a great company who cares about community members. They care about our environment, the safety of the riders and creating opportunities for community building and have a mission to build a future where transportation is shared, affordable and carbon-free. In June 2025, GLE hosted its annual community bike ride with over 200 people in attendance. Lime was present for this event and provided free transportation to our Malton residents. Our residents are familiar with Lime. They enjoy and appreciate the convenience that Lime vehicles provide.

Please accept this letter as a testimony to the positive impact Lime has had on our Malton community.

Sincerely,

*J. Lowe*
